

## **CTropMed<sup>®</sup> Examination**

### **Two Months Clinical Tropical Medicine Experience Documentation**

All applicants, whether applying via the Diploma Course or Practice Pathway, must have two months of hands-on, meaningful, clinical tropical medicine experience. Clinical experience can take place anywhere as long as the setting is applicable to clinical tropical medicine. For high-income country settings, examples could include travel medicine clinics, migrant/refugee health clinics, etc.

For physicians, appropriate clinical tropical medicine experience obtained during medical school may be used if the activities took place during the last clinical phase of training. If the two months of experience have not been completed, application may still be submitted for the examination as long as the remaining criteria for the selected pathway are met. If the candidate passes the exam, ASTMH will hold the certificate until documentation of two months of cumulative clinical tropical medicine experience is submitted and approved.

Using the form below, please submit your clinical tropical medicine experience. Once completed, please upload the document to your exam application.

Full Name: \_\_\_\_\_

Email: \_\_\_\_\_

**Q1. If the clinical tropical medicine experience took place in your home country, what is your home country?**

**Q2. Please specify the following for your hands-on clinical tropical medicine experience(s): list location(s) of experience(s)/countries, dates of experience(s), sponsoring institution(s) and duration for each training. Please give a bullet list only.**

### **Two Months Clinical Tropical Medicine Experience Documentation**

**Q3. For each of your clinical tropical medicine experiences listed in Q2, approximately what percentage of your time was devoted to clinical activities? Please note: Only hands-on clinical activities count towards clinical tropical medicine experience. Time spent doing research/ administration does NOT count towards clinical tropical medicine experience.**

**Q4. In 250 words or less, please describe your clinical tropical medicine experience(s) at each location. What types of patients did you see, what types of infections were diagnosed, treatment plan, etc.?**
